

Undergraduate and Graduate Development Programs

Think through the future

Company Overview

Evans & Peck is an international infrastructure-based advisory company that supports governments and private industry in the operations, conception, development and delivery of major projects and programs. Our primary purpose is to help raise the standard of living of the people in whose communities we operate by improving the way in which infrastructure is created, delivered and operated.

A member of the WorleyParsons Group, Evans & Peck operates as an independent business in parallel with other WorleyParsons businesses and provides strategic business advisory and project advisory services.

As a part of the Evans & Peck team, you will have the unique opportunity to be challenged by a diverse range of high-profile projects, and learn from respected industry leaders in a supportive environment. With a genuine focus on knowledge sharing and the development of young professionals, we can help you to realise your potential and accelerate your future.

Opportunities for Undergraduates

Brisbane, Melbourne and Sydney

OUR UNDERGRADUATE DEVELOPMENT PROGRAM PROVIDES YOU WITH INVALUABLE EXPOSURE TO THE EVANS & PECK CONSULTING EXPERIENCE.

Each summer, we provide highly capable and motivated Undergraduates with 10-12 weeks of paid work experience. As an Evans & Peck Undergraduate, you will be exposed to several core areas of our business, giving you the opportunity to work on a variety of projects supervised by experienced consultants. As a valued member of our team, we aim to provide you with rewarding and challenging work, skills training, and exposure to the social aspects of our organisation, as well as constructive feedback on your period of involvement. Our previous experience is that successful completion of the Undergraduate Development Program often leads to an offer to join our Graduate Development Program.

OUR CAPABILITIES

Evans & Peck offers opportunities in:

- Project Procurement & Delivery
- Contractual Advice & Litigation Support
- Cost Engineering
- Planning and Scheduling
- Risk Management
- Business Advisory Services
- Facilities and Asset Management
- Systems and Technology
- Sustainability and Climate Change

accelerate your future

Opportunities for Graduates

Brisbane, Melbourne and Sydney

OUR GRADUATE DEVELOPMENT PROGRAM PROVIDES GRADUATES WITH UNIQUE EXPOSURE TO A WIDE RANGE OF PROFESSIONAL EXPERIENCES.

As an Evans & Peck Graduate, you will have the opportunity to rotate through various core capability areas and service lines, expanding your horizons and helping you to make informed decisions about your future career path. At Evans & Peck, our Graduate Development Program is managed by one of our senior personnel to ensure that your time with us provides you with the best possible launching pad for future career development. Our program can offer you training in leadership and basic consulting skills and exposure to a broad range of projects, as well as an introduction to the Evans & Peck culture as an innovative, knowledge-based, professional services organisation.

“ The Graduate Development Program at Evans & Peck offers young professionals opportunities to work alongside and learn from experienced professionals of a very high calibre ”

“ As a part of the Evans & Peck team, you will have the unique opportunity to be challenged by working across a diverse range of high profile projects ”

Anna Fisher - Graduate

ANNA JOINED EVANS & PECK AS A GRADUATE IN 2010

Why did you choose Evans & Peck?

After completing the Evans & Peck Undergraduate Development Program in 2009, accepting a position in the Graduate Development Program didn't require a second thought. The rotation system gives me exposure to many facets of the engineering industry. This coupled with a strong sense of community in the office creates an amazing work environment.

First impressions of the Graduate Development Program?

One of the most notable parts of the Graduate Development Program is the level of care shown by senior staff. I have found that, although people are extremely busy, they ensure that the new recruits are adapting to the workplace. This is especially helpful when based in a client's office. Evans & Peck also holds plenty of graduate functions, which allows the Graduate group to bond, as well as the opportunity to meet Graduates from other companies and improve networking skills.

What are you working on at the moment?

I am currently working on the Transport Construction Authority's Glenfield to Leppington Rail Line. My role as Tender Process Manager has allowed me to work directly with other professionals who have an impressive level of experience in the field. It has also given me insight into the procurement process and the commercial side of the engineering industry, which aren't always clearly presented at university.

View for the future?

As I have recently been involved with the early stages of the planning process, I would like to also gain experience of the delivery stage through an onsite role. In addition, after working on a government infrastructure project, I think it would be interesting to gain an understanding of private development so as to compare the different working methods involved. Both of these are possible with the Evans & Peck Graduate Development Program.

Anirudh Mukkavilli - Undergraduate

ANI JOINED EVANS & PECK AS AN UNDERGRADUATE IN 2009.

Why did you choose Evans & Peck?

I applied for Evans & Peck's Summer Undergraduate Development Program after a friend at UNSW (who had been there the year before I joined) spoke highly about Evans & Peck and the quality of work she undertook during her internship. After a short time at Evans & Peck, something which became immediately obvious was the wealth of opportunity they offer their Undergraduates. Evans & Peck's mentoring, diverse experience, training and continuous development combined with the firm's friendly and collegiate culture led to a great summer experience.

First impressions of the Undergraduate Development Program?

What I find particularly striking about the Undergraduate Development Program is the balance Evans & Peck strikes between a very supportive environment where you can learn from those around you and the tremendous responsibility given to Undergraduates and trust placed in their work.

What are you working on at the moment?

I am working in the Decision Modelling service line and am currently working on two projects: a modelling/process-improvement study of a manufacturing plant and a portfolio-based optimisation of carbon abatement opportunities to assist a large utility company with its project selection.

View for the future?

I hope to learn about, and get directly involved in, the delivery of complex projects. I am also very interested in getting involved in sustainability and how best it can be incorporated into the various stages of these large projects.
